Recommendation list for cars and installation of iZi Kid Isofix

The iZi Kid Isofix is a semi-universal Isofix child restraint system. It is approved to regulation 44.04 series of amendments for general use in vehicles fitted with Isofix anchorage systems. It will fit vehicles with positions approved as Isofix positions (as detailed in the vehicle handbook), depending on category of the child and of the fixture. The mass group and the Isofix size class for which this device is intended is : C. The iZi Kid Isofix is suitable for fixing into the seat positions of the cars listed below, providing approved Isofix points are fitted and available. Seat positions in other cars may also be suitable to accept this child restraint, however we have not yet tested that combination of car and iZi Kid Isofix seat. If in doubt, consult either BeSafe or the retailer. For updated carlist see: www.besafe.com.

When the support leg is positioned on a storage compartment in front of the car seat, this compartment has to be completely filled up with Expanded Poly Styreen foam (EPS), so that the cover can hold the forces of the support leg. Consult the car dealer, if they offer a special solution or if the storage compartment is strong enough. When the floor under the floor support is insufficient to hold the forces you can not use the iZi Kid Isofix in this position of the car. Carseat positions marked with * can have a storage compartment in front of the seat. Isofix anchorages in the passenger seat (position 1) are normally offered as option, so depending on the model this position can be available or not.

BeSafe recommends to install the iZi Kid Isofix in all vehicle seat positions which are intended to be used and check installation, available space in the vehicle and position of the child, to verify if the iZi Kid Isofix is acceptable for your situation.

! Notice: DO NOT use on a passenger seat fitted with activated frontal airbag.
